

RouterBOARD 1000

The heart of this device is a new state of the art PowerPC networking processor which makes the RB1000 faster than any other MikroTik product.

Our tests have shown that it can throughput up to 400000pps or 3.2Gbps full duplex!

Two CompactFlash slots for webproxy cache and configuration backups of the User Manager database or The Dude server are also present.

RB1000 includes RouterOS - the operating system, which turns this powerful system into a highly sophisticated router/firewall/bandwidth manager.

The unstoppable power of RouterOS and RouterBOARD combined, we bring you the fastest MikroTik router yet.

CPU	PPC8547 1333MHz network processor
Memory	SODIMM DDR Slot, 512MB installed
Boot loader	RouterBOOT, 1Mbit Flash chip
Data storage	Onboard NAND memory chip
Ethernet	Four 10/100/1000 Mbit/s Gigabit Ethernet with Auto-MDI/X
miniPCI	none
Compact Flash	Two CompactFlash slot (TrueIDE Microdrive supported)
Serial port	One DB9 RS232C asynchronous serial port
Beeper	Present
Power options	Power jack: 12V DC (includes power supply)
Fan	Dual fan with failover support
Case	Desktop case included
Dimensions	14 cm x 16 cm
Operating System	MikroTik RouterOS v3, LEVEL6 license
