

# (IN/G44) PCI 4-port adapter

# RouterBOARD44G Gigabit Ethernet

This is the perfect four port card for a router or a server. The easy to use MDI/X feature (accepts both cross-over and straight cables) can now be used on your router or server. This device integrates four 10/100/1000Mbps Gigabit Ethernet ports into one card that is an ideal solution for connecting many networks to one router or for extending your network.
